Subject: Re: Odenton Landfill Update

Tracy,

Julie's response is correct, MDE is still in the process of compiling and responding to comments received on the project. There is one update however, MDE recently sent notice to the applicant that additional information would be required showing the United States Fish and Wildlife Service had provide the United States Army Corps of Engineers a Section 7 Endangered Species Consultation in accordance with the Endangered Species Act for the Northern Long Eared Bat. Because the assistance of outside agencies will be required for the applicant to respond to MDE's request, MDE notified the applicant in advance of finalizing MDE Response to Comments. The applicant is in receipt of MDE's request but we have yet to receive any further information. A copy of the Letter sent to the applicant is attached for your convenience.

Andrew
